

Gas Isn't Cheap!

We've been told more than once our prices are too high. The truth is, they are higher than last year, but it's not because we're trying to boost our profits. Here's the reality of the shipping business:

A snapshot of diesel fuel prices (per gallon) over the last six years gives you a solid understanding of why shipping anything has gone up.

- Mar-03 \$170.8
- Mar-04 \$162.9
- Mar-05 \$221.4
- Mar-06 \$255.9
- Mar-07 \$266.7
- Mar-08 \$388.1
- Apr-08 \$408.3
- May-08 \$442.5

And the alarming thing, in just two months, we've climbed almost another 56 cents to 4.64 a gallon!

You know how it feels paying \$4.00 per gallon! We have that same pain as our prices are tied to the price of diesel fuel, which makes REGULAR seem like a deal!

Also, we are a very experienced transport broker and we earn your business with quality service and fair, up-front pricing. We never low-ball a quote just to hook you. We pay quality carriers a fair price so they can maintain their trucks -- and that gets your car delivered on-time! Having been in this business for 10+ years I KNOW when you find the best carriers/drivers, you take care of them, and they in turn take very good care of you and your car.

If someone has quoted you hundreds less than us, call us and we can help you understand what you might be missing. No Charge!

We appreciate your understanding&

Tiffany Parker

President
